

DOCUMENTS TO BE SUBMITTED
together with the Request for Pattern Approval

1. Name, designation of pattern and inventory of the measuring instrument: prototypes of the instruments with a statement, which indicates whether they are prototypes from a production line test run, or from an established production line.
2. Name and address of the manufacturer of the measuring instrument.
3. Documents indicating the applicant's authority to represent the manufacturer.
4. Metrological characteristics of the measuring instrument.
5. Intended and possible legal applications of the measuring instrument.
6. Reference to regulations under which the pattern is to be approved.
7. Pattern approval certificate of the measuring instrument or other relevant document.
8. Manufacturer's specifications of metrological characteristics of the measuring instrument.
9. Inventory of instruments, devices, materials and other special requirements.
10. Other relevant information.

Supporting documents:

1. Detailed specifications relating to assembly, internal operation, adjustment, safety devices etc. of the measuring instrument (original documents should be submitted in the Latvian language)
2. Documents intended for users including the instructions for installation and maintenance of the measuring instrument (to be submitted in the Latvian language).
3. Reports of the evaluation of the measuring instrument (if any).

The Latvian National Metrology Centre is authorised to claim for additional information if necessary.
